WEBSITE PROJECT PROPOSAL 1: MPHO'S BAKERY

1. Organisation Overview

Name: Mpho's Bakery

Mpho's Bakery is a hypothetical small bakery located in Polokwane, Limpopo. The business specialises in freshly baked bread, cakes, cupcakes, biscuits and customised birthday cakes. The bakery aims to provide affordable, high-quality baked products to individuals, families and small events.

Mission: To provide fresh, affordable and high-quality baked products while delivering excellent customer service.

Vision: To become a trusted local bakery known for quality products, creativity and reliable service.

Target Audience: Local residents, students, families, businesses and customers looking for cakes and baked products for birthdays, weddings and other events.

2. Website Goals and Objectives

The main goal is to create a professional website that allows customers to discover Mpho's Bakery and easily enquire about products and services.

Objectives include:

- Increase awareness of the bakery.
- Display products and prices.
- Generate customer enquiries.
- Make it easier for customers to request customised cakes.
- Provide contact and location information.

Key Performance Indicators (KPIs):

- Number of website visitors.
- Number of contact/enquiry submissions.
- Number of product enquiries.
- Number of customers requesting cake quotations.

3. Current Website Analysis

Mpho's Bakery does not currently have a dedicated website. Customers mainly depend on social media and word-of-mouth recommendations. This can make it difficult for new customers to find complete information about products, prices and contact details.

4. Proposed Website Features and Functionality

The website will contain:

- Home page.
- About Us page.
- Products and Services page.
- Gallery.
- Contact page.
- Online enquiry form.
- Business location and operating hours.
- Social media links.

5. Design and User Experience

Colour Scheme: Warm brown, cream and light orange to create a welcoming bakery identity.

Typography: Aptos or another clean sans-serif font, with larger headings and readable body text.

Layout and Design: The website will use a clean, modern and responsive layout. High-quality images of cakes and baked products will be used to attract customers (Nielsen, 1994).

6. Technical Requirements

The website will use **HTML5** for structure, **CSS3** for styling and responsive design, and **JavaScript** for interactive features. It will require a domain name and web hosting. Images should be compressed to improve website performance.

7. Timeline and Milestones

Week	Activity
Week 1	Research and proposal
Week 2	Content collection and wireframes
Week 3	HTML development
Week 4	CSS styling
Week 5	JavaScript and functionality
Week 6	Testing and corrections
Week 7	Final documentation and submission

8. Budget

Item	Estimated Cost
Domain	R200 per year
Hosting	R1,200 per year
Website development	R4,000
Maintenance	R500 per month
Images/graphics	R500
Estimated initial total	R5,900
