WEBSITE PROJECT PROPOSAL 2: UBUNTU COMMUNITY CARE

1. Organisation Overview

Name: Ubuntu Community Care

Ubuntu Community Care is a hypothetical non-profit community organisation operating in Limpopo. The organisation supports disadvantaged families by collecting and distributing food, clothing and educational materials. It also aims to connect volunteers and donors with community projects.

Mission: To support vulnerable community members by providing essential resources and creating opportunities for community participation.

Vision: To build stronger communities where individuals and families have access to basic support and opportunities to improve their lives.

Target Audience: Community members, donors, volunteers, local businesses and organisations interested in supporting community development.

2. Website Goals and Objectives

The primary goal of the website is to increase awareness of Ubuntu Community Care and make it easier for people to support its activities.

The objectives are to:

- Explain the organisation's mission and activities.
- Increase donations and sponsorship enquiries.
- Recruit volunteers.
- Share community projects and success stories.
- Provide clear contact information.

Key Performance Indicators (KPIs):

- Number of website visitors.
- Number of volunteer registrations.
- Number of donation enquiries.
- Number of contact-form submissions.
- Number of visitors viewing community projects.

3. Current Website Analysis

Ubuntu Community Care does not currently have a dedicated website. Information is shared through informal communication and social media

4. Proposed Website Features and Functionality

The website will include:

- Homepage.
- About Us page.
- Our Projects page.
- Volunteer page.
- Donation information.
- Gallery.
- News and community stories.
- Contact page.
- Online volunteer/contact form.
- Social media links.

5. Design and User Experience

Colour Scheme: Green, white and gold. Green will represent growth and community, while gold can be used as an accent colour.

Typography: Aptos will be used for readability, with clear headings and consistent text hierarchy.

Layout and Design: The website will have a clean, welcoming and professional appearance (Nielsen, 1994).
