4. Website Structure and Planning

4.1 Sitemap

The sitemap provides a visual representation of the structure of the Mpho's Bakery website. It shows how the main pages are connected and how users can navigate through the website.

Website Page Structure

1. Homepage – index.html

The homepage will be the first page visitors see. It will contain:

- Navigation menu
- Bakery logo

- Hero image
- Short introduction to Mpho's Bakery
- Featured products
- Call-to-action button
- Links to the Products and Enquiry pages

2. About Us – about.html

This page will introduce the organisation and provide information about:

- History of Mpho's Bakery
- Mission statement
- Vision statement
- Business values
- Team members

3. Products – products.html

This page will provide detailed information about the bakery's products, including:

- Birthday cakes
- Wedding cakes
- Cupcakes
- Bread
- Biscuits
- Customised cakes
- Product descriptions
- Product images
- Prices where applicable

4. Enquiry – enquiry.html

The enquiry page will allow customers to contact the bakery about products and services. The form will include:

- Full name
- Email address
- Phone number
- Product/service required

- Preferred date
- Quantity
- Additional message
- Submit button

5. Contact – contact.html

The contact page will provide customers with ways to communicate with the bakery. It will include:

- Telephone number
- Email address
- Business hours
- Social media links
- Contact form
- Map showing **more than one bakery location**

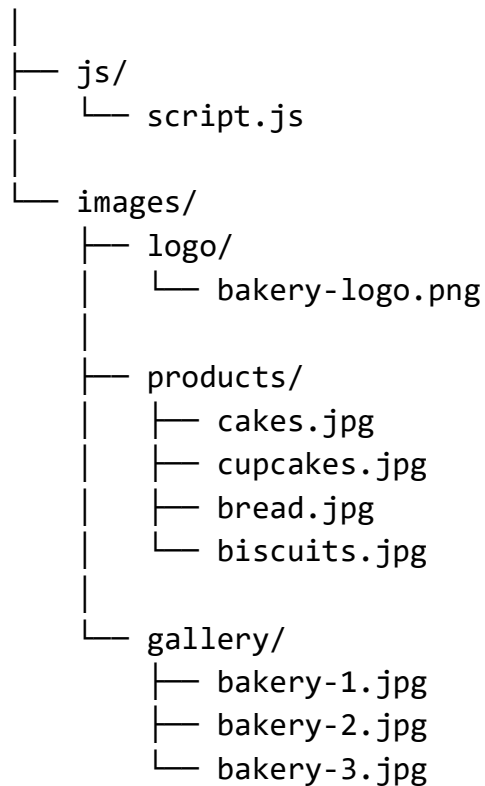

For the assignment, two fictional branches can be used:

- Polokwane Branch
- Mankweng Branch

4.2 File and Folder Structure

The Mpho's Bakery website will use a structured folder system to keep the HTML, CSS, JavaScript and image files organised.

```
Mphos-Bakery/
|
|— index.html
|— about.html
|— products.html
|— enquiry.html
|— contact.html
|
|— css/
|   |— style.css
```

Description of the Folders

Folder/File	Purpose
index.html	Homepage of the website
about.html	Information about Mpho's Bakery
products.html	Displays bakery products
enquiry.html	Customer enquiry form
contact.html	Contact details, locations and map
css/	Contains website styling files
style.css	Controls colours, fonts, layout and responsiveness
js/	Contains JavaScript files
script.js	Adds interactive functionality
images/	Stores images used throughout the website
logo/	Stores the bakery logo
products/	Stores product images
gallery/	Stores general bakery/gallery images

This structure will make the website **easier to develop, maintain, test and update** because related files are grouped together in clearly labelled folders.
